Brand 1 Overview

Executive Summary

*The **Global South Index (GSI)** is a new platform built to give African and Global South researchers the global visibility they deserve. Instead of relying on expensive, Western-focused platforms like Scopus, GSI uses Web3 (blockchain) technology to create a fair, permanent, and community-owned index.*

The Logo System 2

Logomark

The logomark is based on the initials "G.S.I." of the brand. The creative direction was based of the concept of a ship's radar which searches and identifies objects and a bookmark which emphasizes the academic audience the brand targets.

This aligns with the brand's niche, identity, and brand services.

Structure

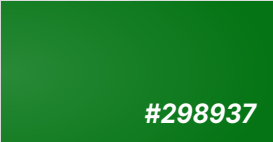

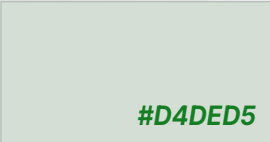

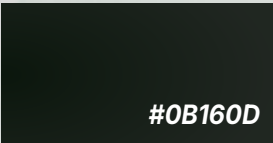

Logo Usage

Colour Palette 3

Brand Colours

 #298937	 #D4DED5
 #0B160D	 #D5D6D6

The brand colours were selected to align with academic audiences indigenous to Africa.

The green colour palette was selected to represent the overall vitality of the African people and the growing potential for more.
